

Water Conservation

Water conservation remains a high priority throughout the State. As a minimum, please continue to implement the following measures:

1. Protect against frozen pipes. Install and utilize shut-off valves on your side of the meter, and then drain your on-site water system when you leave. Insulate water pipes outside the structure and in the crawl space beneath the structure.
2. Install low-flow showerheads and toilet tank displacement devices.
3. Repair leaky faucets and valves. A leaky faucet can waste 1,500 gallons per month.
4. Use buckets instead of running hoses to wash vehicles, equipment and structures.
5. Use brooms rather than hoses to clean sidewalks and driveways.
6. Minimize landscape irrigation, especially during hot summer days to prevent evaporation.
